

SCOPE

The 14th International Conference on Software Engineering and Formal Methods (SEFM 2016) is co-located with Software Technologies: Applications and Foundations, STAF 2016, and presents an interdisciplinary forum for the presentation of new advances and research results in the fields of Software Engineering and Formal Methods. The conference aims to bring together leading researchers and practitioners from academia, industry and government, to advance the state of the art in formal methods, to facilitate their uptake in the software industry, and to encourage their integration within practical software engineering methods and tools.

MAIN TOPICS OF INTEREST

- New Frontiers in Software Architecture
- Software Verification and Testing
- Software Development Methods
- Application and Technology Transfer
- Security and Safety
- Design Principles
